

# WEINIG'S THEME DAYS

The complete package  
for solid wood processing

**Welcome**  
**to Tauberbischofsheim**  
15. - 17. November 2011  
from 8:30 - 17:30 hrs

## Welcome

to WEINIG's theme days in Tauberbischofsheim.

Consistently maximizing opportunities and positioning yourself in the market are major challenges for every company.

Smooth processes, high availability of machines and products and services geared to customers' needs are key factors for success.

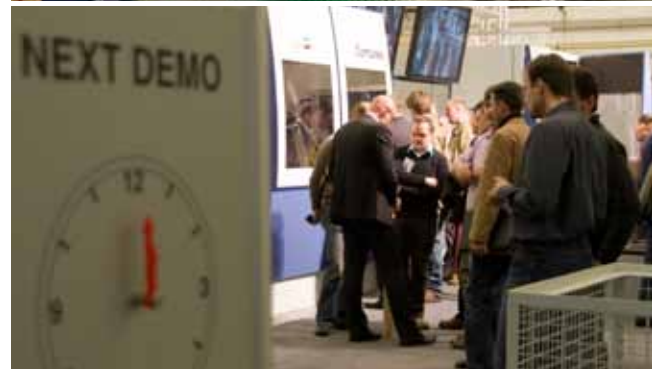

Come and find out about ground-breaking trends and innovative technologies. Experience 100% quality for solid wood processing in our machine demos and talk to our experts in person.

Come to WEINIG's theme days in Tauberbischofsheim from 15. to 17 November.

Your

Stephan Weber  
Chief Sales Officer

## The future is wood

## Grow with WEINIG

Responsible management of resources is the main focus of our company. Fossil fuels are inevitably coming to an end; too much energy is being wasted in the manufacture and disposal of traditional construction elements. Wood, in contrast, offers everything the material of the future has to have. Wood is renewable, is CO<sub>2</sub> neutral and has excellent thermal insulation properties as well. Wood will play an important role in the world of tomorrow. And you will be leading the way.

WEINIG is the only company in the market which has committed itself to solid wood in its entirety. With technology which is perfect for the time. With ideas which make wood, the raw material of the future, attractive economically. In all areas – from interior fittings to windows to wooden house construction. With ground-breaking solution for wood optimization through to energy saving systems for machines and the perfect response to trends such as structure planning.

## Demonstrations of machines and know-how offered by our experts

### Live demonstrations

- Cube
- Powermat 1000
- Powermat 2000
- Powermat 2000 XL
- Powermat 2000 SP
- Powermat 400
- Powermat 2500
- OptiCut S 90
- OptiCut 450
- FlexiRip 3200
- ProfiRip KR 310
- Ultra TT
- EScan

## Experience our products and solutions at a glance

### Main topics

- Sawing on a planer/moulder
- A perfect finish – is it possible without sanding?
- Cube – there's no simpler solution
- New applications with oscillating spindles

## Program

### Talks on sawing, finishes, the Cube and new applications

10:30 - 11:30 Talk by Peter Lohmeyer,  
Head of Product Unit Profiling  
Seminar room in the ExpoCenter

### 12:30 - 13:30 Lunch

13:30 - 14:30 Talk by Peter Lohmeyer,  
Head of Product Unit Profiling  
Seminar room in the ExpoCenter

## Demonstrations of machines and know-how offered by our experts

### Live demonstrations

- OptiCut S 50
- Powermat 500 Window
- Unicontrol 6
- Conturex 114
- Conturex 226
- UniPin
- Multirex 320

## For every type of window production the best solution

### Main topics

- Frame by frame
- Single-item batches
- One-off production
- Profile splitting
- Counter-corner connections
- Round arches
- Conservatories
- Front doors

## Program

### Individual solutions by WEINIG for perfect windows for the market

10:30 - 11:15 Talk by Thorsten Rügamer,  
Product Management Product Unit Windows  
Seminar room in the ExpoCenter

### 12:30 - 13:30 Lunch

13:30 - 14:15 Talk by Thorsten Rügamer,  
Product Management Product Unit Windows  
Seminar room in the ExpoCenter

## WEINIG's theme day Wooden house construction – Knowledge for a competitive edge

Ever-increasing demands of customers, rapid changes in construction techniques and environmental technology, ever-shorter lead times: all these present manufacturers of wooden houses with ever-greater challenges. Organization, vertical know-how of staff as well as flexible and high-performance machines and systems are central pillars for the wooden house market of tomorrow. Whether availability of wood, ecology, the controversy surrounding preservation of wood or new developments in solid wood products and manufacturing technologies – there are numerous aspects to be considered in order to be able to take the right decisions. You will find this information at WEINIG - well researched, at first hand and in a pleasant, relaxing atmosphere.

## Program, presentations, discussions

8:30 - 8:45 Welcoming address by Wolfgang Pöschl, WEINIG

8:45 - 9:45 Current challenges to the energy and sustainability policy of the wood industry  
*Prof. Arno Frühwald*

### 9:45 - 10:15 Coffee break

10:15 - 11:00 Sustainable wooden constructions without chemicals  
Standards - Research - Practical construction  
*Borimir Radovic*

11:00 - 11:45 Solid wood construction techniques 2020  
Developments and trends  
*Josef Egle*

### 11:45 - 13:00 Lunch

13:00 - 13:45 Finger jointing trends Vertical – Horizontal  
Contactless glue application

13:45 - 14:30 Press systems for solid wood walls  
Innovative concepts – manual sorting to minimize waste - customized solutions

14:30 - 15:15 WEINIG your systems supplier for wooden house construction  
Projects 2012

### 15:15 - 15:45 Break

15:45 - 17:30 ExpoCenter / Guided tour of factory  
Live demonstrations

## External speakers

**Prof. Arno Frühwald**, Center for the Wood Industry, University of Hamburg  
**Borimir Radovic**, Chartered Engineer, Senior Construction Officer, Chairman of the Standards Commission DIN 68800-2

**Josef Egle**, Chartered Engineer, expert at the CCI for wooden house construction, officially appointed supervisory and certification agency  
Talks will be given in German

**WEINIG offers more**

WEINIG is not simply the leading provider of technology for the solid wood processing industry and artisan sectors. From extensive services and cost-effective system solutions to turnkey production facilities, WEINIG is your all-round ideal partner wherever flexible, profitable production is required. Together with its unequalled worldwide service, WEINIG can offer you a complete package to equip you optimally for all future challenges in the market of the future: solid wood processing.

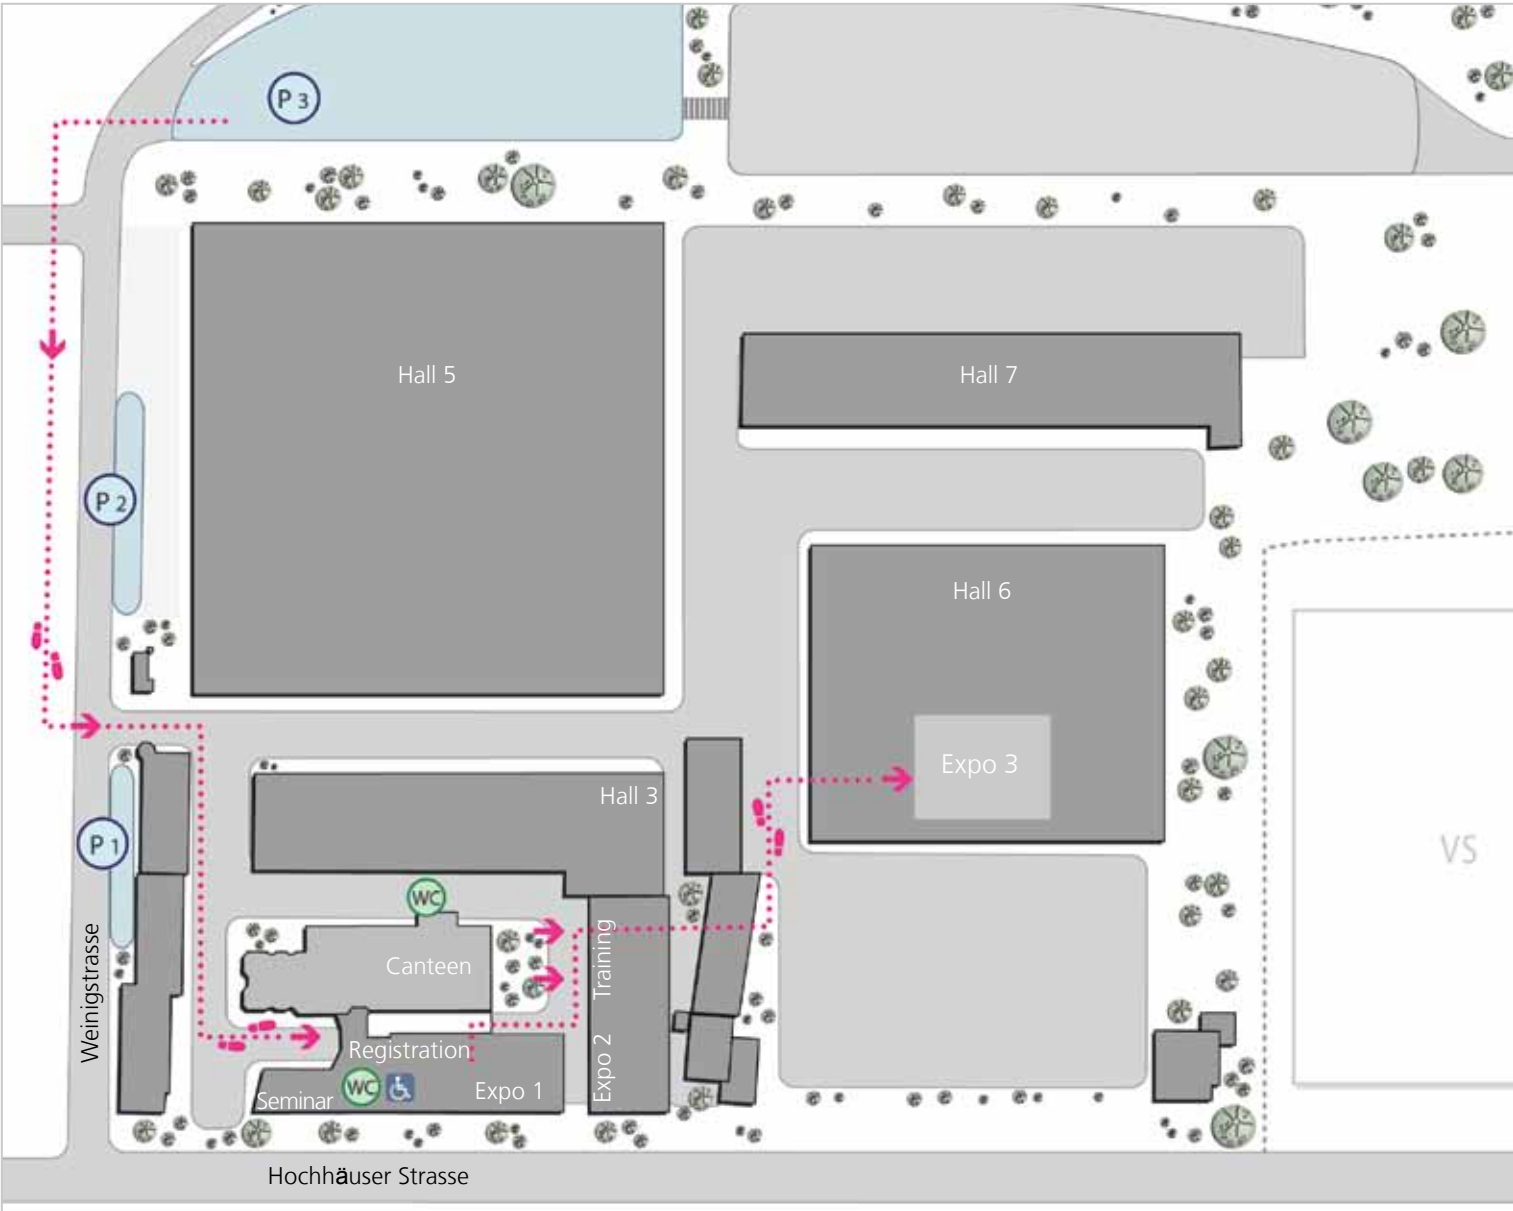

The complete package  
for solid wood processing!

RIPPING - CROSS-CUTTING · OPTIMIZING · FINGER JOINTING  
GLUING · PLANING AND PROFILING.  
WINDOW PRODUCTION · AUTOMATION
